# Autumn / Winter Installation Service Agreement

(For BTW service subscribers to be installed between Oct 1 and May 1)

---

I, the undersigned, have agreed to have installed on my premises BroadTrack Wireless equipment ("BTW") from Kingdom Technology Solutions ("KTIS") for the purpose of receiving KTIS high-speed Internet access service.

I understand that by agreeing to have the equipment installed on my premises during the autumn/winter months, I risk the possibility of periods of poor or no service when normal foliage returns in the spring and summer months. I understand that such foliage may severely hamper or even block the BTW signal.

I understand that, should service quality deteriorate or become unavailable due to foliage in the spring and summer months, I have the option of placing my BTW service on "vacation hold" status for up to six (6) months or I may discontinue service altogether.

Should I decide to put my BTW service on "vacation hold", I agree to pay five dollars (\$5) per month for up to six (6) months in lieu of my normal monthly BTW service charge. At the end of the maximum six (6) month period, I understand that my BTW service will automatically be returned to "normal service" status and my monthly service charge will return to its previous normal amount for the remainder of my initial twelve (12) month service commitment.

I understand that, should I decide to discontinue service altogether, KTIS may, at its sole discretion and with my full and complete consent, decide to retrieve the BTW equipment from my premise; at which time I agree to pay KTIS \$99 for BTW equipment removal. In the event that I wish to remove and return the BTW equipment myself, I understand that I must do so within 7 business days of notification of service discontinuance to avoid being required to pay the \$99 equipment retrieval fee.

I understand that, after discontinuing service altogether during the spring and summer months, should I decide to reinstate service, I will be charged the one-time \$99 basic installation/service activation fee. Such installation/service activation fee to be due and payable prior to service activation and regardless of whether or not the BTW equipment was removed from my premise during the period of service discontinuation.
